Ms. Glenda Velez US EPA 5 Post Office Square – OEP06-01 Boston, MA 02109-3912

Re: NPDES Phase II Stormwater General Permit 2009-2010 Annual Report Town of Orleans, MA

Dear Ms. Velez:

On behalf of the Town of Orleans, MA, please find enclosed the NPDES Phase II Stormwater General Permit 2009-2010 Annual Report. The Annual Report has simultaneously been filed with the Massachusetts Department of Environmental Protection (MassDEP).

Should you have any questions or require any additional information, please do not hesitate to contact me at 978-692-9090 x308.

Sincerely,

AMEC Earth & Environmental, Inc.

Rich Niles

Water Resources Project Manager

Title: Town Administrator
Date: 4/30/10

#### Part II. Self-Assessment

The Town of Orleans has completed the required self-assessment and has determined that our municipality is in compliance with all permit conditions, except for the following provisions: modifications were made to the schedule for obtaining measurable goals, as discussed in the applicable sections of this report. Permit eligibility information related to Historic Properties and Endangered Species, notable accomplishments and additions to the Town's Stormwater Management Program (SWMP) are discussed below. Many of the additions to the SWMP include ongoing activities that were not specifically discussed in the NOI or previous annual reports.

#### Permit Eligibility Regarding Historic Properties & Endangered Species:

As discussed in the Year 6 Annual Report, the permit eligibility regarding the protection of Historic Properties was listed as pending at the time Orleans submitted the Notice of Intent (NOI). From investigations in Permit Year 6 it was concluded that that the MS4 discharges within the Town of Orleans do not adversely affect properties listed on the National Register of Historic Places and historical sites in Town. Permit eligibility regarding the protection of Endangered Species was also noted as pending on the NOI; however, this information was improperly reported. The Town previously received letters dated April 8, 2003 from the U.S. Fish and Wildlife Service and the Massachusetts Division of Fisheries and Wildlife indicating that the stormwater discharges in Orleans are not likely to affect federally-listed "Threatened" or "Endangered" species.

#### Notable Accomplishments:

The Town of Orleans has developed significant ongoing programs to improve marine and fresh water quality and work towards the goals of the Phase II Permit and the final TMDLs for pathogens and nutrients. The efforts of the Marine and Fresh Water Quality Task Force, past and planned BMP construction projects and the development of the draft 2009 Comprehensive Wastewater Management Plan (CWMP) have or will result in significant water quality and habitat improvements. As discussed in the Year 6 Annual Report, funding was appropriated for the construction of stormwater BMPs at Crystal Lake. The BMPs were designed and constructed in Permit Year 7 to remove suspended solids and attenuate pollutants through infiltration. In March 2009, the Town developed and submitted a grant application to the Natural Resources Conservation Service (NRCS) for the design and construction of stormwater BMPs at 4 locations to address key outfalls and water quality concerns. The project also includes an anadromous fish run/ladder. The Town appropriated \$157,000 to provide the required grant match. The project focuses on water quality and habitat improvements to Pochet Inlet, Pilgrim Lake, Meetinghouse Pond and Pleasant Bay. The total project budget is ~\$714,000 and the Town is awaiting the award of the successful grantees.

As part of the development of the draft CWMP, the necessary waste load reduction and environmental impact related to structural wastewater improvements and non-structural BMPs have been assessed. Additionally, the necessary improvements have been evaluated as part of a CWMP Capital Improvement Plan (CIP). The Town anticipates reviewing the new Phase II permit and the

requirements related to TMDLs and impaired water bodies to develop a strategy and BMPs that consider these ongoing efforts to improve water quality.

### Additions to SWMP in Permit Year 7:

- BMP B.6 Water Day Celebration
- BMP C.4 Comprehensive Wastewater Management Plan
- BMP C.5 Public Education for Illicit Discharges
- BMP D.3 Establish a Procedure for Receipt of Information by Public
- BMP F.8 Inventory of BMP Locations & Needs
- BMP F.9 Stormwater Training for Highway Staff

# Part III. Summary of Minimum Control Measures

## 1. Public Education and Outreach

BMP ID#	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 7 (Reliance on non-municipal partners indicated, if any)	Planned Activities – Next Permit Term
A.1	Develop and Broadcast Via PA CATV Storm Water Video	Mark Budnick, Highway Manager	One per year – in conjunction with County Group	The video "After the Storm" was made available through an internet media player on the Highway Department's	Continue broadcasting "After the Storm" video on local cable.  Evaluate methods for tracking the

A.2	Household Hazardous Waste Control	Mark Budnick, Highway Manager	Annual HHW Collection	Collection days were held in Eastham on July 18 <sup>th</sup> and in Orleans on	Continue reciprocal HHW collections with the Town of Eastham. Continue
Revised			# residents participating	September 19, 2009. 246 Orleans households participated and a total of ~12,201 lbs. was collected from Orleans residents based on an average weight of 49.6 lbs./household.  Event organizers also tracked the effectiveness of the various advertisement methods and ~67% of participants heard of the events through the brochure.	tracking resident participation and results.
A.3	Education Flyers	Mark Budnick, Highway Manager	Distribute 2 per year at Transfer Station	Two different flyers (500 each) were made available at the Transfer Station	Develop additional flyers based on EPA sample materials. Continue to
Revised			# flyers taken by residents	and Town Facilities. The Highway Department began coordinating with each facility to track the number of flyers taken. Additional public education materials from the EPA website were reviewed to identify potential flyers for use by the Town.	distribute educational flyers and/or other materials and begin tracking materials taken.

BMP ID#	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 7 (Reliance on non-municipal partners indicated, if any)	Planned Activities – Next Permit Term
A.4 Revised	Web Page Information	Mark Budnick, Highway Manager & Peter VanDyck, IT Coordinator	Short Article – one per year  # website hits	As discussed under BMP A.1, the video "After the Storm" was posted on the Highway Department's web page. The links to EPA's NPDES Stormwater Program web page and the Town's stormwater bylaws were maintained.  Agendas, meeting minutes and additional information were posted on the web page for the Marine and Fresh Water Quality Task Force.	Continue to maintain existing web pages related to stormwater and water quality. Evaluate additional web page links and begin tracking the number of hits. Develop short articles or topics that can be posted annually on web pages.
A.5	Other Public Education In Year 6	Mark Budnick, Highway Manager		Copies of "The Orleans Blue Pages" water quality protection booklet (50+ pages) developed by the Orleans Pond Coalition	Continue existing public awareness activities and evaluate methods to track materials taken, posters,
Revised	Other Public Education Activities in Year 7		# copies of "Orleans Blue Pages" taken by residents # posters displayed	were made available at no cost for residents at Town Hall.  Pollution awareness posters were displayed and/or renewed at the Library, Town Hall, Police Station, hardware stores, local veterinary hospitals and kennels. Posters included information related to vehicle washing, pet waste disposal, fertilizer use and vehicle maintenance, as appropriate.  The Highway Department evaluated materials for use at a stormwater display at the August 2010 Town Block Party.	displays and audience (number) reached.
A.6	Storm Drain Stenciling	Mark Budnick, Highway Manager	Stencil storm drains leading to critical priority outfalls.	The Orleans Highway Department stenciled 30 catch basins in April 2010 in the highly visible downtown area.	Continue storm drain stenciling activities at highly visible areas and areas that drain directly to priority outfalls and waterways. Solicit
Revised		Marine & Fresh Water Quality Task Force	# stenciled drains per year		volunteers through the Marine and Fresh Water Quality Task Force. Evaluate a potential stenciling event as part of the anticipated Water Day Celebration in Fall 2010.

# 2. Public Involvement and Participation

BMP ID#	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 7 (Reliance on non-municipal partners indicated, if any)	Planned Activities – Next Permit Term
B.1 Revised	Water Quality Monitoring Program	Marine & Fresh Water Quality Task Force Town Administrator & Board of Selectmen	# samples collected, water bodies assessed each year & water quality improvements	Water quality monitoring was performed over the permit year for all estuaries and freshwater bodies. The Marine & Fresh Water Quality Task Force met once per month to review monitoring activities and results related to priority water bodies and potential improvement projects.	Continue monitoring water quality and tracking program results. Use monitoring results to develop remediation plans for high priority areas. Continue to support Task Force and hold monthly meetings.
B.2 Revised	Estuaries Program & Comprehensive Wastewater Management Plan	Director of Planning and Development	Ongoing  Development of MEP Reports, Progress towards a final CWMP	The Town continued work to develop the April 2009 CWMP, which requires the elimination of 52% of individual septic systems to control nutrients. The CWMP also evaluates and recommends additional nutrient controls such as fertilizer control, stormwater management, water conservation, wastewater flow and load reduction, enhancement of embayment flushing and land use controls.  The goal of the program is to meet the TMDL for Pleasant Bay, the anticipated TMDLs for the Nauset system and Rock Harbor, and help protect 8 priority ponds. Work continued on the Naused MEP Report.  As part of the ongoing work to develop the CWMP, 4 public hearings were held to review and provide input for the program.	Continue to work on the CWMP, involve the public, and progress towards a final plan. Incorporate elements of the CWMP into the SWMP to meet the new permit requirements, as appropriate.

BMP ID#	BMP Description	Responsible Dept./Person Name	Measurable Goal(s)	Progress on Goal(s) – Permit Year 7 (Reliance on non-municipal partners indicated, if any)	Planned Activities – Next Permit Term
B.3	Storm Drain Stenciling	Mark Budnick, Highway Manager	Stencil storm drains in downtown area and other at systems leading to critical priority outfalls.	As discussed under BMP A.6, the Orleans Highway Department stenciled 30 catch basins in April 2010 in the highly visible downtown area.	Continue storm drain stenciling activities at highly visible areas and areas that drain directly to priority outfalls and waterways. Continue to solicit volunteers through the Marine
Revised		Volunteers	# stenciled drains per year & # volunteers		and Fresh Water Quality Task Force or other community groups. Evaluate a potential stenciling event as part of the anticipated Water Day Celebration in Fall 2010.
B.4	Outfall Monitoring	Mark Budnick, Highway Manager	Perform dry weather outfall monitoring of all outfalls that were initially observed to have flow during the GIS locating.	4 volunteers inspected 15 critical priority outfalls throughout the permit term and any dry weather flows were noted. Remaining outfall inspections were completed by Highway staff. Both staff and volunteers were trained	Continue to support the efforts of the Marine & Fresh Water Quality Task Force to perform dry weather monitoring and coordinate with BMP C.4. Coordinate efforts with the Orleans Pond Coalition volunteers.
Revised	Volunteer Outfall Monitoring Program	Marine & Fresh Water Quality Task Force	# volunteer participants	on data collection.  The results of inspection activities were reviewed by the Marine & Fresh Water Quality Task Force and incorporated into the prioritization scheme for future improvement projects.	
B.5	Maintain Animal Waste Collection Bags in Key Areas of Concern	Orleans Pond Coalition		"Mutt Mitts" animal waste collection bags were maintained by volunteers from the Orleans Pond Coalition at key	Continue maintenance of "Mutt Mitts" program and ensure proper disposal of wastes. Evaluate methods

### **7a.** Additions (none at this time)

#### 7b. WLA Assessment

As discussed in this annual report, the Town of Orleans has developed significant ongoing programs to improve marine and fresh water quality and work towards the goals of the Phase II Permit and the final TMDLs for pathogens and nutrients. The efforts of the Marine and Fresh Water Quality Task Force, past and planned BMP construction projects and the development of the draft 2009 Comprehensive Wastewater Management Plan (CWMP) have or will result in significant water quality and habitat improvements. As part of the development of the draft CWMP, the necessary waste load reduction and environmental impact related to structural wastewater improvements and non-structural BMPs have been assessed. Additionally, the necessary improvements have been evaluated as part of a CWMP Capital Improvement Plan (CIP). The Town anticipates reviewing the new Phase II permit and the requirements related to TMDLs and impaired water bodies to develop a strategy and BMPs that consider these ongoing efforts to improve water quality.

## Part IV. Summary of Information Collected and Analyzed

Beach monitoring was performed by the Town of Orleans Health Department in Permit Year 7. Additional water quality data was collected for various water bodies in Permit Year 7. This data is available upon request through the Marine & Fresh Water Quality Task Force and the Town Planner.
